

Using the DeviGuard

DeviGuard can be used with 3 elements at any one time

The ALARM sound is a loud continuous tone

Set-up

- 1 Fit the 9v battery (Battery Bay at the rear base of the unit)
- 2 Connect to the Element(s) as per instructions below.
- 3 Push the button IN for ON (push again for OFF - button OUT)

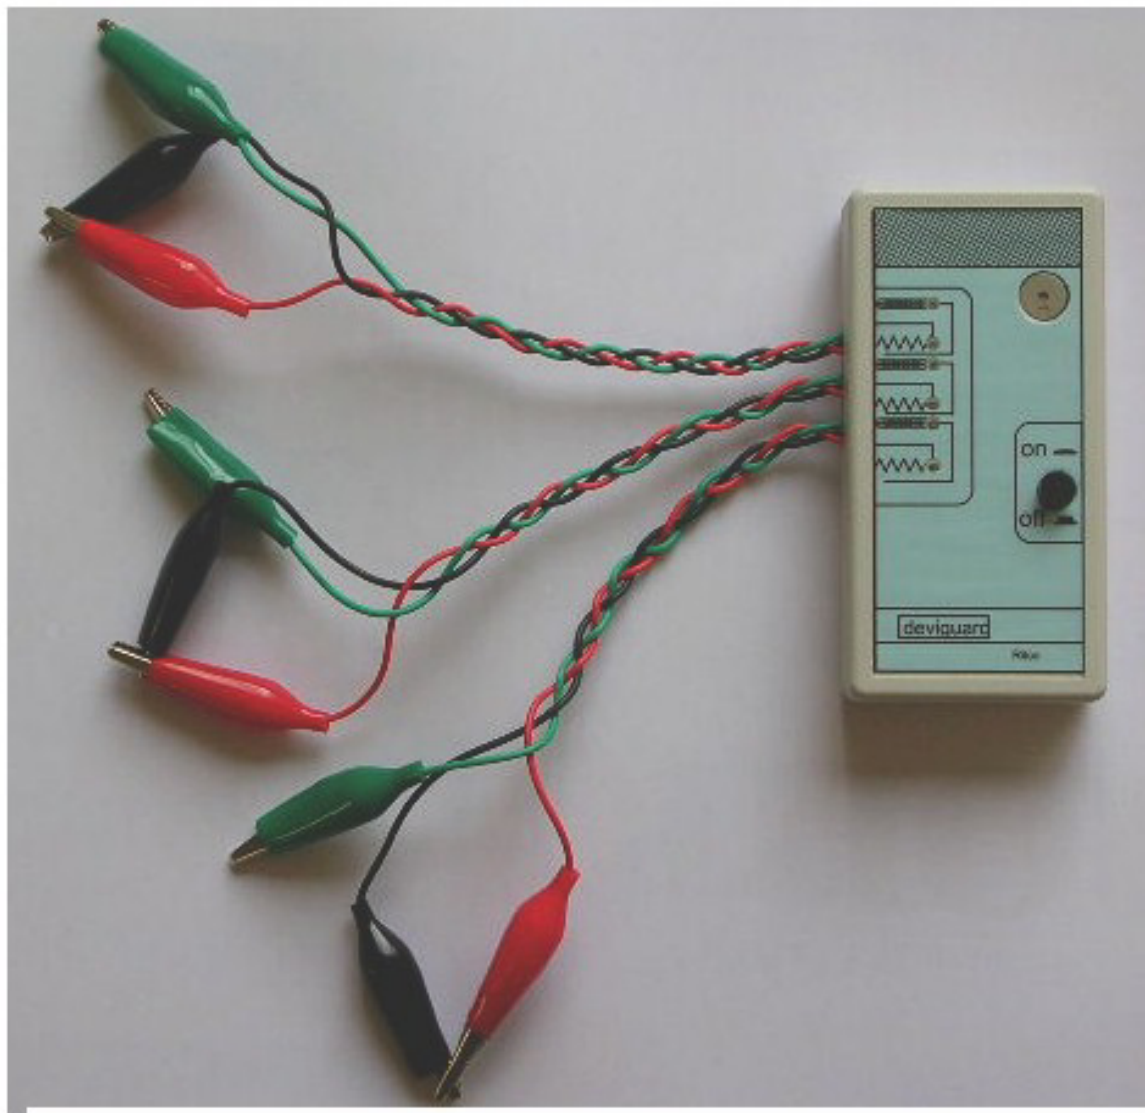

Connecting your DeviGuard to the Element(s)

Connect the **Red & Black** clips to each end of the element and connect the **Green** clip to the Screen (earth)

NOTE: Clips not in use MUST be left as illustrated - Red & Black connected - otherwise DeviGuard will false alarm

The DeviGuard will Alarm if-

- (a) the element is cut
- (b) the element is shorted to the Screen (earth)

Typical Cable Section
